Human brain has an in-built limit on the attention span. We all get bored with things. This is particularly visible in kids. Limited attention span means we can't maximize the learning input. This is why most toys have a short lifespan, and other kids' toys seem always more interesting. The same goes for reading. Even the best articles can become taxing if they get too long. Millions of people do a daily ...

A scriptural framework leads to specific expectations about the genetic differences among humans and other species, expectations that have been scientifically tested against modern genetic data. Genetics confirms the recent, supernatural creation of Adam and Eve and refutes the evolutionary narrative on human origins.

Sergals (Japanese: セルガル, S?garu, Ancient name: Sieg) are a race that have various features which are similar to plural Earth's animals with a human-like head. They are one of the three sentient and sapient Eltus race who are regarded as the "human existence" on the Planet Tal. They have features reminiscent of sharks, rabbits, kangaroos, canines, reptiles, avian, and others.
