In Java 7, the try-with-resources syntax requires a fresh variable to be declared for each resource being managed by the statement.. In Java 9 there is an additional refinement: if the resource is referenced by a final or effectively final variable, a try-with-resources statement can manage a resource without a new variable being declared:

Java 7 is no longer publicly supported, and Java 9 has stopped receiving updates since Java 9 was a short-term rapid release version that has been superseded by Java 10 and now Java 11. For Java 11, long-term support will not be provided by Oracle for the public; instead, the broader OpenJDK community, as AdoptOpenJDK or others, is expected to perform the work.

Java Modules are a feature of Java itself, available since Java 9, that allows for better encapsulation. In Gradle, each source set containing Java sources can be turned into a module by adding a module-info.java file. Typically, in a project with Java Modules like this one, the main source set of a subproject represents a module. src └─ main └─ java └─ module-info.java ...
